BOOK SYNOPSIS

"There are simply not enough texts that look comparatively at the two foremost experiments with questions of race, culture, and and class in the English-speaking world, the United States and South Africa. Prudence Carters work is simultaneously scholarly and compassionate. It helps us see, in these two benighted but globally important societies, how easily things break, but also how well, when structures are in place and when human agency takes flight, individuals and the groups to which they belong flourish and grow."---Crain Soudien, Deputy Vice-Chancellor, University of Cape Town --
